

Rido Aditya Auritama

Mechatronic Engineer

Kecamatan Sukaraja, Kabupaten Bogor | +62821 1234 0571 | ridoadityaauritama@gmail.com | www.linkedin.com/in/ridoaditya

Focused on the industrial and automation sectors, specifically in PLC & IoT, yet not limited to the technical aspects. Actively developing business ideas, articulating concepts, and designing relevant solutions for the challenges of the digital era. I believe the future is shaped not only by technology, but by the courage to think differently and take concrete action.

WORK EXPERIENCE

PT GS BATTERY

Surya Cipta, Karawang

Officer Process Engineering (Contract)

July 2025 – Agustus 2026

- Eliminating the risk of lead overflow in the MLR area by developing an emergency UPS (Uninterruptible Power Supply) system using GS MF Spectra batteries.
- Reduce cycle time on the COS (Cast on Strap) AMB Assy line 5 machine from 23 seconds to 18 seconds by developing a water chiller system on the mold strap.
- Reduce the rejection of leaking pole batteries by 90% in line 7 MCB VRLA ASSY by designing and implementing an automatic pole cover system.
- Reduced process variance in the Pasting department by 11.66% by designing and implementing a high-accuracy automated counting system to improve production data integrity.
- Developed a real-time data logging system for Polarity Testers using Python and Node-RED to enable predictive maintenance and minimize unplanned machine downtime.

PT AKEBONO BRAKE ASTRA INDONESIA

Kelapa Gading, Jakarta Utara

Internship Engineering Assembly

January 2025 – Juni 2025

- Support Engineering Team to first winner in G-QCC Mitsubishi Supplier Club (MSC) 2025
- Develop a Tightening Bleeder Machine Project to automatic process
- Develop a Packing Grease Machine to simplify the process

PADJAJARAN SUITE RESORT & CONVENTION HOTEL

Bogor Nirwana Residence, Bogor

Internship Engineering

January – May 2020

- Maintenance and repair of electrical components, as well as the roof and walls of the hotel
- Installation of electrical components such as lights, water pumps, and electrical panels

ORGANIZATIONAL EXPERIENCE

ASTRA POLYTECHNIC

Kabupaten Bekasi, Cikarang Selatan

Programmer Coordinator for the Robotics Student Association

February 2024 – February 2025

- Preparing the program flow before handing it over to the project team
- Developing programs for each planned project

Workshop Instructor for PTC Creo 5 Design

23 March 2024

Delivered fundamental design materials using PTC Creo 5 software, including:

- Creation and assembly of designed parts into a movable system
- Creation of animations from the assembled parts

Secretariate for the Robotics Student Association

January – November 2023

- Develop an Activity Plan with the team as a foundation for the Robotics Student Association activities
- Create letters and proposals for submission to the institution

Committee Member for Secretariat and Supervision of the Submarine Competition

October 2023

- Creating rules for participants, boot camps, and competitions
- Designing and preparing questions for the semifinal and final rounds of the Submarine Competition
- Supervise the competition to ensure it runs following the written rules

- Managing the team to ensure alignment with the goals to be achieved
- Planning the concept of the events to be held
- Supervise and ensure that objectives and plans run smoothly

PROJECTS EXPERIENCE

Thermal Imaging – Monitoring Thermal Condition in a Room**September – December 2024**

- Made thermal camera with mlx90640 sensor and LCD TFT SPI
- Made PCB and 3D Design for Hardware

Elysium – Smart Home Integrated with IoT and AI**August 2024**

- Made concept, prototype, and wiring for smart home automation
- Made simple machine learning for face detection
- Programmed using C# Arduino IDE, Node-Red, and Python
- Database: Influx DB
- Micro Controller: ESP32 and Arduino UNO

SecureTrack Box – The Box for Safety Delivering**June 2023 – August 2024**

- Made concept and 3D design to monitor the box for shocks, theft, and real-time tracking
- Designed using Creo Parametric 5

BroilerPlus – Automation System for Broiler**July – June 2024**

- Made concept, prototype, and wiring for an automation system for broiler
- Made UI/UX for Android application
- Made simple machine learning for broiler detection
- Programmed using C# Arduino IDE, Android Studio (Java), and Python
- Microcontroller: ESP32 and Arduino UNO

InTernak – Automation System for Cow and Goat**May – July 2024**

- Made concept, prototype, and wiring for an automation system for cow and goat barns
- Made simple machine learning for cow and goat detection
- Programmed using C# Arduino IDE, Android Studio (Java), and Python
- Microcontroller: ESP32, Arduino UNO, and Arduino Mega 2560

Elaeis Automatic - Autonomous vehicle designed for palm oil industry**September 2023**

- Made concept and 3D design for Autonomous Vehicle
- Designed using Creo Parametric 5

SKILLS

- Language : Indonesia (Native), English (Intermediate), German (Basic), Japan(Basic)
- Electricity : Drawing, wiring, measurement, and PCB design
- Node-Red : Connecting with MQTT, MySql Database, InfluxDB, and Telegram notification
- Database : firebase, MySql, InfluxDB
- PLC and Scada AVEVA : Omron, Schneider, Mitsubishi, and Siemens
- 3D Designed : Creo Parametric 5/9, Solidwork and SketchUp
- C++ for Arduino IDE program
- Basic in Python programming, application for computer vision
- Intermediate Android application programming using Android Studio
- Softskills : Teamwork, fast learner, problem solving, stress management, self confidence

EDUCATIONS

Bina Nusantara, Online**Juni 2025 – Now**

Bachelor degree – Industrial Engineering

Diploma 3 – Mechatronics

- IPK 3.92
- Certificate of Electrical Competence with Qualification is Equipment Maintenance 2024
- The recipient of a Full Scholarship from Astra Polytechnic, PT Yayasan Astra Bina Ilmu, 2022

SMK Negeri 2 Bogor, Bogor Utara

July 2019 – July 2022

Electrical Engineering

- Best Student in the Electrical Engineering specialization program
- Made an Emergency Lamp for the electrical workshop

AWARDS

- 2nd Place in United Tractors Digital Hackathon Project 2025
- 2nd Place Winner, Gold Award, Best Team, and Best Idea of Essay Competition Global Innovation Sprint 2025
- 1st Place in the Business Model Canvas (BMC) Competition 2025
- 1st Place in the Case Study Category Astravate, Astra Polytechnic 2024
- 2nd Place in NOVASTECH at Astra Polytechnic, PKM-KC 2024
- 1st Place in United Tractors Digital Hackathon Project 2024
- 1st Place in Essay Competition POMAF, Astra Polytechnic 2024
- Gold Award Virtual Competition of Creative and Innovative Ideas (VICCI) 2024
- Silver Award and Reliability Global Youth Innovation Competition (GYIC) 2024
- 2nd Place in Scientific Writing of Agriculture Competition 2024
- 2nd Favourite Winner of Salman Techno Fest 2024
- Recipient of PKM-VGK 2024 Funding
- 1st Place in NOVASTECH at Astra Polytechnic, Gemastik 2023

TRAINING & COURSES

- Advanced PowerPoint Masterclass for Professionals - Udemy Course 2025
- Super Way to Learn Arduino - Udemy Course 2025
- PLC Mitsubishi Q-Series Basic to Intermediate using Gx-Works2 and Gt-Designer, Engineering EDU 2025
- PLC Mitsubishi Programming and Implementation Training: Automation of Controller Panels in the Industrial World, Microtech Academy 2025
- Equipment Maintenance Scheme Level 3 Training Participants, Astra Polytechnic 2024
- Mastering Microcontrollers and Basic Programming with Arduino Workshop, Creative Station 2023
- Basic Military Training for Students, Astra Polytechnic, 2023
- HTML Advance Certification Course, Programming Hub 2021

ADDITIONAL INFORMATION

- Top 15 Semifinalist of PLC Competition Tech Enthusiast Day (TED), Universitas Gadjah Mada 2024
- Top 15 Semifinalist of Workshop Electro PLC Competition (WEPC), Politeknik Negeri Malang 2024
- Top 15 Semifinalist National PLC Competition SEVENT, Politeknik Negeri Sriwijaya 2024
- Top 20 Semifinalist E-TIME PLC Competition, Politeknik Negeri Jakarta 2024
- Top 10 Semifinalist in Astronauts 2024 Innovation Competition category, with over 900+ pitch decks
- Participant in Essay Competition Pertamina Goes to Campus 2024
- Member of EXPO IoT Competition, Politeknik Negeri Semarang 2024
- Semifinalist in Science Project and Innovation 2024 at Institut Teknologi Surabaya in the Scientific Paper
